COMMISSION

Attn. Mr. Jess Derouen
Re: Case #2013-00332

We wish to express our opposition to the announced intention of AmeriGas to discontinue our current gas service and replace it with individual residential tanks. The following points should be considered:

- Our neighborhood system is less than 6 years old and is performing well.
- To my knowledge, there have been no complaints regarding our present system
- Common sense shows the proposed changes will not increase efficiency and will not be esthetically pleasing.
- We have all paid significant tap on fees (\$500-1000) to receive the current gas supply.
- The neighborhood should not be penalized with increasing gas prices for the benefit of the parent company.
- We would expect that an environmental study would be needed before any metal tanks containing gas could be buried.
- Not only do current deed restrictions not allow burial of gas tanks on our properties, but each home has septic sewer systems with buried laterals running throughout the properties.

We would appreciate being notified of any public hearing. Thank you for your consideration.

Respectfully,

Robert and Deborah Battey
